## ALL STEEL LAB BENCH

C-Frame

Mobile Unit Cabinet

### ALL STEEL LAB BENCH

It's designed by CAD and digital-precision made. As a single unit, it can be assembled with a better formation to fit into your lab space. It's with good weight bearing, long lifetime and excellent cost performance. It can meet your space requirement for laboratory.

The workstation body is using selected 1.0mm thickness first-class cold/galvanised steel sheet, automatic skimmers forming, phosphating and picking treatment for surface, epoxy resin powder, no prominent section block, smooth charm, outstanding acid-proof and alkali-proof performance.

Worktop can choose lab-grade phenolic resin, Trespa, epoxy resin, ceramics etc. exclusive table materials.

H-Frame

H-frame Wall Cabinet

**H-Frame**  
 The Steel & Wood lab bench includes two kinds of structure. H-frame works better with heavy bearing.  
 It selects 40x60/30x30mm square steel, phosphating and pickling treatment surface, epoxy resin powder paint, no prominent section-block, smooth charm, outstanding acid-proof and alkali-proof performance.  
 Stainless steel and rubber adjustable feet. It's damping-proof, corrosive-proof. It's with shock absorbing function and with better weight bearing. The adjustable height is 30-50mm and its bearing capacity can reach above 150KG.  
 Steel H-frame can meet the requirements of using large-scale precision and can hold more than 500KG weight.  
 Worktop can choose lab-grade phenolic resin, Trespa, epoxy resin, ceramic etc exclusive table material.
